

SMS Controller Quick Start Guide

Step 1: Insert Sim Card into Sim Socket in the back of the unit (Please ensure Sim Card has been registered on the network and has credit available.

Step 2: Attach the aerial provided.

Step 3: Connect DC Voltage (9-30vdc) to the Batt + and Batt – terminals.

Step 4: The LED will fast flash until it finds the network, it will then slow flash (every 3 seconds) which indicates it has found the network and ready to go.

Step 5: Send the following text to the unit's cell number Set User

The unit will respond with: " Your number has just been added to the user list"

Congratulation the unit is now ready to use.

See manual for further instructions.
